QUICK START GUIDE
Eyrus Kiosk

Your Eyrus tablet comes pre-installed with the Eyrus Visibility App.
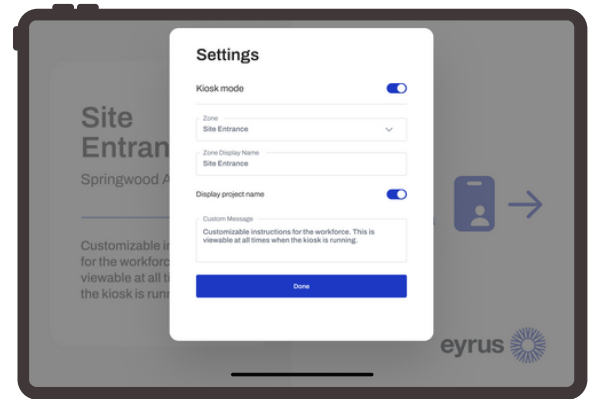

1 Open the Eyrus Visibility app and choose Kiosk Mode under mode selection to get started.
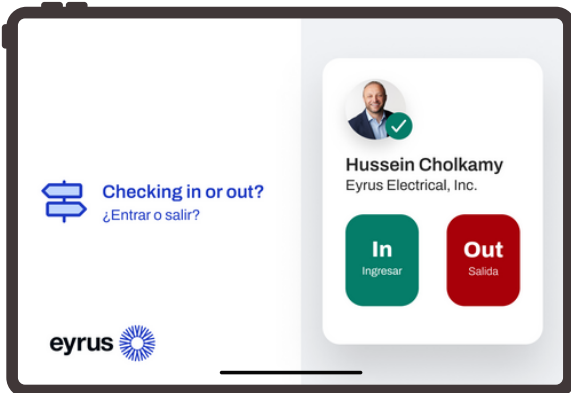

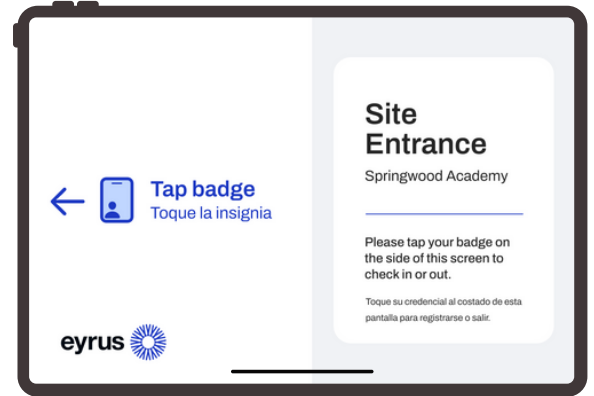

To exit kiosk mode, tap the Eyrus logo twice.

2 Assign the kiosk to your project and zone. This is the zone to which all check-in/out events will be associated.

Open the settings window by tapping the Eyrus logo using two fingers.

You can also enter/edit a custom message that will appear on the kiosk ready screen.

3 After confirming these settings the tablet will enter kiosk mode and is ready for workers to tap their badges.

When a worker taps their badge, they will have the option to check in our out of the site.
They will see a confirmation of checked-in, checked-out, or no access if their card has not been assigned to this site and zone.
